EXPERIENCE

Platform Product Manager, District by Zomato (Eternal Ltd.) **Gurugram ● Apr 2026 – Present**

Zomato's going-out platform spanning dining-out, movies, and live events. Own app-wide Search, Discovery, Personalization, Notifications, and AI-native products end to end; report directly to the CEO.

- Led the 0-to-1 launch of AI-powered contextual search combining upgraded keyword retrieval with model-based intent understanding, cutting null-result searches from **7% to 1.8%**, lifting search CTR by **5%**, and generating a **2% daily GMV uplift**.
- Incubated AI products from functional POC through launch, including a voice-driven navigation agent using LLM tool-calling and deterministic grounding, and one-click Indic-language movie translation; built hands-on prototypes with AI-assisted coding to validate UX, model capability, latency, and technical feasibility before engineering investment.
- Increased inventory views by **30%** by introducing ML-based homepage personalization across customer cohorts.
- Ran the push-notifications charter, lifting day-0 user opt-ins by **8%** through growth experiments and introducing prioritized pushes and in-app reminders.
- Kickstarted new discovery surfaces including in-app curations, maps, and outing planning, expanding how users discover and navigate going-out inventory across the platform.

Head of Product & Growth (Advisory), CanvasX AI **Remote ● Jan 2025 – Apr 2026**

Applied-AI lab building agentic workflow products for SMBs; led product strategy, GTM, partnerships, and forward deployment across India, the US, and Europe.

- Drove 0-to-1 product strategy and deployment for agentic AI products, translating customer workflows into production implementations across multiple markets.
- Architected the product, pricing, and deployment model for **Sketch**, a multiplayer agentic workflow harness with credit-based consumption tiers and Bring Your Own Key options balancing inference cost, latency, and output quality; adopted by **25+ SMB teams** in India.
- Built the sales pipeline from scratch, including the first Fortune 100 prospect and SMB opportunities across India, Dubai, and the EU.
- Led forward deployment of an agentic data-analysis product for an omnichannel retail client with **25,000 users**, increasing incentive-achievement rates by **8%** within 60 days of launch.

Product Manager – Tech, Audible Originals & Content Systems, Amazon Inc. **New York ● Aug 2021 – Dec 2024**

Owned content intelligence, monetization, and production platforms for Audible Originals and Studios businesses across global marketplaces.

- Developed and operationalized ML segmentation of **20M+ listeners into 36 taste categories** across Audible and Amazon in 11 countries; became the standard evaluation framework for deploying **$100M+ in first-party content production** over 2 years.
- Took LLM-based text-to-speech audiobook production from research prototype to production pipeline, reducing localization timelines by **36%** across 3 languages and expanding the monetizable first-party and second-party catalog into **8+ countries**.
- Created a new audiobook-to-TV rights business generating **~$7M GMV**, a platform for global TV producers to discover and acquire first-party content rights.
- Launched a creator-payments API for the publisher and creator ecosystem, improving error-free, on-time payments from **70% to 93%** across 12 markets within 2 quarters.
- Established the global source of truth for production, deals, and publishing operations, cutting audiobook time-to-market by **50%** and podcast time-to-market by **70%** across 12 markets; also powered Audible Brazil's **$12M content-acquisition program** with an operations suite taken from idea to deployment in 2 weeks.

Product Manager, RateGain **Noida ● Jan 2018 – Jun 2019**

B2B SaaS travel-pricing intelligence platform; owned scraping infrastructure and data products. Converted from intern after Jan–Jun 2018 internship.

- Translated customer feedback into new data products including one-click on-demand scraping, Airbnb pricing intelligence, and pricing-difference previews, contributing to a **40% revenue increase over 3 quarters**; launched geo-located scraping and won customers across the US, EMEA, and APAC.
- Engineered ML framework "DataSURE", increasing successful-scrape rates from **94% to 98%** across 550+ bots and lifting NPS by **25 points within 2 quarters**. As an intern, delivered an airline-pricing product from scratch that enabled **~10% revenue uplift per customer**.

EDUCATION

Cornell Tech, Cornell University — MS, Information Systems (Jacobs Technion-Cornell dual MS) New York, NY • 2021

Manipal University Jaipur — BE, Computer Science Jaipur, India • 2017

SKILLS

AI & Data: Foundation model integration, agentic workflows and tool-calling, LLM evaluation, rapid functional POCs with AI-assisted coding, cost-latency-quality trade-offs, voice AI, conversational AI, neural search, information retrieval, knowledge graphs, SQL, Redash, Tableau

Platform & Ecosystems: Search and discovery, ML-based personalization, consumer app surfaces, developer and creator ecosystems, content systems, payments infrastructure, marketplace platforms, subscription and pricing models, experimentation and A/B testing, international expansion

Product Leadership: 0-to-1 incubation, product vision and roadmaps, research-to-product translation, executive communication, cross-functional alignment, user validation, UX design and wireframing, go-to-market strategy, forward deployment
